Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,634,448 (Bland) in view of Patent No. (US 6,321,695). Yoo et al.

Claim 1 of the Bland ('448) patent is identical to claim 1 of the applicant's specification, except the applicant additionally claims "...a switch means for switching the fan between the standard and discharge directions as a function of radiator coolant temperature". Yoo et al teaches a switch means or FCM (28) for changing the state a bi-directional fan as a function of the coolant temperature, see Column 2, lines 61-65 and Column 4, lines 55-60. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the vehicle invention with a switching means as claimed by Bland ('448) to include a "switching means" for changing the bi-directional fan state, as taught by Yoo et al, in order to provide a specific factor giving a timely,

automatic system for changing the fan direction and improving the overall efficiency of the cooling system.

Although the confliction claims are not identical they are not patentably distinct from each other because they claim common structural limitations with minor variation in claim recitation resulting in no structural difference between the patent and the instant application.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Samejima et al (US 5,199,521) discloses a lawn mower having a radiator cooling system for an engine. Roach (US 5,960,899) discloses a radiator system and housing including a fan for a vehicle. Peter et al (US 5,947,219) discloses a lawn mower and radiator system. Fujikawa et al (US 4,862,981) discloses a lawn mower with radiator and fan configuration.
